

The Configurator That Automates CAD

KBMax is a Knowledge Based Configurator (KBC) that boosts efficiency for engineer-to-order manufacturing companies.

KBMax captures and securely stores all knowledge, rules, and specifications to automate the creation of custom 3D Models, CAD Drawings, Price Quotes, BOMs, and Office Documentation.

Custom designs and price quotes in minutes not days

A seamless platform for engineering and sales to meet customer requirements

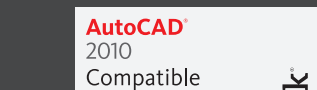

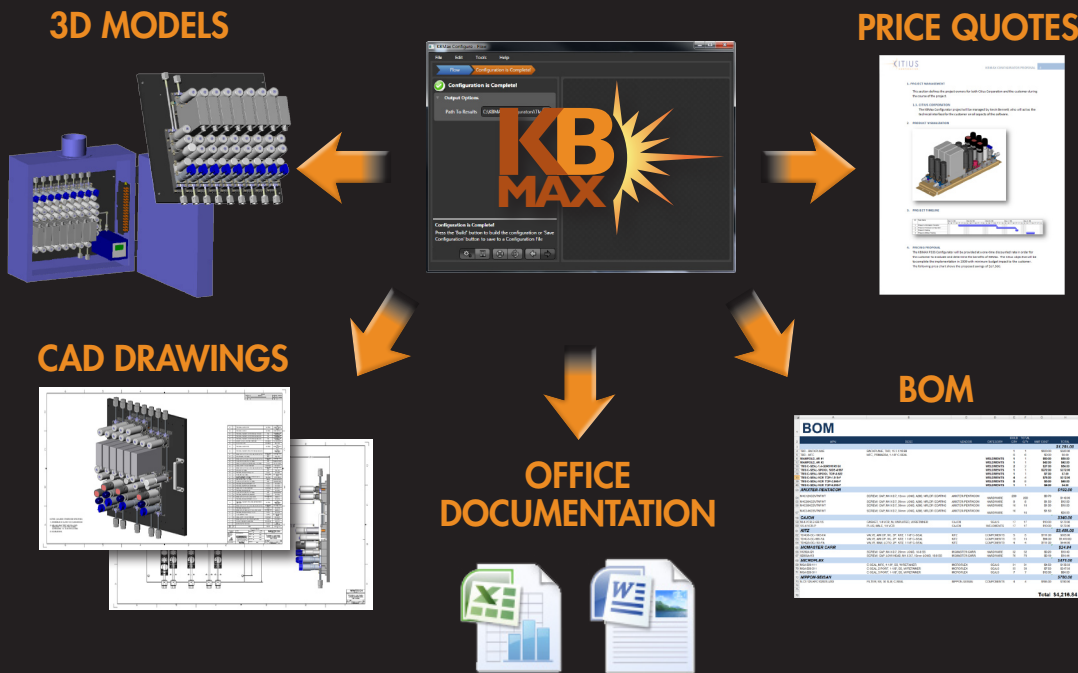

Boost efficiency and power higher profits

KBMax users in the semiconductor equipment industry reduced design cycle and price quotation times by 90%.

KBMax Boosts Custom Engineering in Industries Like:

- Semiconductor Equipment
- HVAC
- Elevators
- Solar Panels

KBMax can be used stand alone or integrated with the following CAD programs.

Learn how KBMax can save your company time and money at www.citiuscorporation.com or www.kbmax.com for more information, product videos, & guided demos.

Please Turn Over For Visual Examples of KBMAX Automation

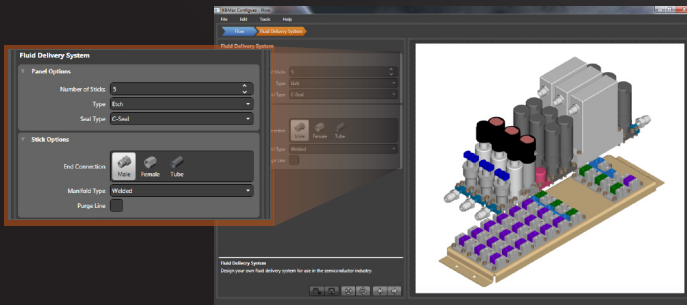

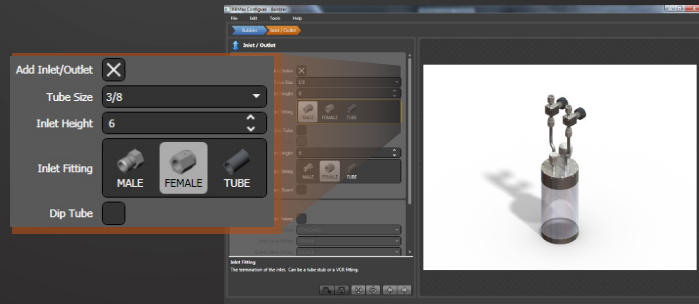

KBMax Configures The Engineering Of Many Custom Products

AUTOMATE PRODUCT SPECIFICATIONS

KBMax lets engineers specify precise dimensions & components for a chemical delivery vessel.

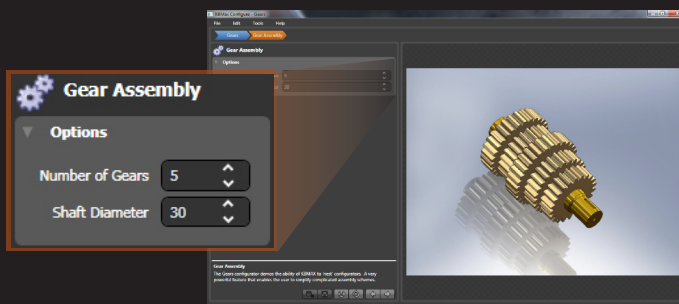

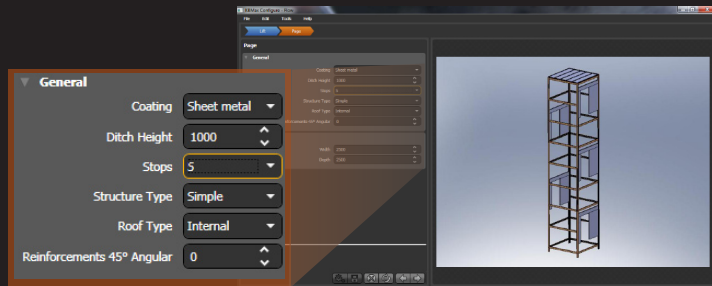

BUILD MODELS FROM SCRATCH

KBMax builds complete CAD assemblies like this fluid delivery system for use in the semiconductor equipment sector.

INSTANTLY UPDATE PROJECT PARAMETERS

KBMax instantly modifies specific customer needs for this elevator shaft frame.

QUICKLY CUSTOMIZE COMPLEX ASSEMBLIES

KBMax allows engineers to nest component designs within full product designs. A multiple part product like a custom gear assembly can be built with a few simple inputs.
